ACTIVITY DAY

The image shows a person standing in front of a large screen displaying a presentation. The person is wearing a white shirt and a dark vest, and is gesturing with their hands. The screen displays a presentation titled "INTRODUCTION" and "ABSTRACT:". The "ABSTRACT:" section contains the following text:

Due to the increase in population and the demand of concrete for construction purposes and Aggregates are the main constituents in concrete. Re-use of waste avoids the disposal and is also helpful in reducing the gap between demand and supply of aggregates.

- This research deals with partial replacement of natural coarse aggregates (NCA) with recycled coarse aggregates (RCA) in concrete group 10, 20 & 30 years in different proportions like 20%, 30%, 40%, 50% and 20 grade of concrete is adopted.
- Curing of specimens were done for 28 days to attain the maximum strengths. Partial replacement of fine aggregate with granite powder at 5%, 10%, 15% was also done.
- After replacement, curing was done for 28 days. Specimens of RCA with Granite powder were tested for compressive and tensile strengths.

keywords: Recycled concrete aggregate, Granite powder, Concrete.

The presentation is displayed on a large screen, and the person is standing in front of it, gesturing with their hands. The screen also shows a sidebar with thumbnails of the presentation slides and a taskbar at the bottom with various icons.
