Objectives

Object:

Certification courses are basically courses that don't require you complete a program in such a long span. ... Many colleges and universities offer standalone courses, certificate programs and diploma programs that can prepare students for professional certification.

Observation: Certification includes an experience and education component and requires passing an exam. ... A certificate program typically indicates attendance or completion of a course or series of courses with a specific focus. They are open to newcomers and experienced professionals alike.

Outcome: Learning outcomes are statements that describe significant and essential learning that learners have achieved, and can reliably demonstrate at the end of a course or program. In other words, learning outcomes identify what the learner will know and be able to do by the end of a course or program
