Elegance and strength

Can you see the double-headed images in this haunting painting by Salvador Dalí? If you are puzzled, the title of the painting, *Swans Reflecting Elephants* may help you to stop the optical illusion.

Shape up

Cross your eyes so that a third image appears between the other two. You should find that this extra image 'shimmers' - this is because your brain cannot work out whether to use the white or black image.

While you are looking, turn your attention to the left-hand diagram only. What is the minimum number of different colours you would need to colour in all the white areas so that no two areas that share a border are the same colour?

Odd fellows

There is a kind of illusion hidden in these shapes? Can you see which two wedges are the odd ones out?

Code Maze

This code maze is in four parts. At no time must you travel along the same path twice. Part One requires you to spell out the name of a colour on your route. The letters that spell the colour must be in the right order and you may not pass through any other letters as you go. Part Two requires you to pass through all the squares of the colour

Code Maze

revealed in Part One. You may pass through as many other colours as you like. Your route in Part Two will spell out instructions for Part Three. Part Three's route will give a coded clue to Part Four, in which you must spell out, without passing any other letters, the name of a legendary character who would not be fazed by the maze.

The Green Man

The 16th century Italian painter Giuseppe Arcimboldo Pioneered the technique of metamorphic art. Look at the painting below (*Market Gardener or Joke with Vegetables*). On first sight it is a standard arrangement of vegetables. Now turn it upside down - What do you see?

Trident tested

This is one of the most familiar optical illusions in the world. At first glance it looks like a three-pronged implement, but look closer - all is not as it seems.

Impossible Triangle

Look at the triangle to your right. How would you describe the positioning of the ball? Is it nearer the top or the bottom of the triangle?

Line Weight

Which of the Lines between the arrow heads is the longest?

The tomb of the Pharaohs

When Egyptologists first discovered the pyramids, the resting places of the pharaohs, they moved breathlessly from room to room in search of riches. Egyptian pyramids had only a few chambers, but our burial monument is filled with rooms. Starting somewhere in the large ground-floor chamber, you play the role of the explorer, gathering the three icons in order

(  ), then taking them to the very top room of the pyramid. You are not allowed to enter any room in the pyramid more than once, except the large ground-floor room where you started. If you wish, you can use the acetate sheet to mark out your route as you go.

A kitchen under the microscope

1. Look carefully at this picture for 30 seconds and then cover it.

2. Now answer the following questions

1. How many bottles are on the shelf above the refrigerator?
2. What dish is being cooked in the oven?
3. What is the time shown on the clock?
4. How many fridge magnets are there on the refrigerator door?
5. Can you make coffee in this kitchen? What utensils would you use?
6. How many windows are there in the room?
7. What objects are lying on the table beside the fruit bowl?
8. What colour is the oven glove?
9. There is a pot on the gas stove; what colour is it?

The pull of the Black hole

Find the only path connecting the two arrows. You may not take two crossroads of the same colour successively.

The maze is another classic game testing visual attentiveness and concentration. It is difficult to complete the puzzle if you are interrupted while in progress. You will not be able to memorise a maze but the more mazes you do, the more proficient you will become. This is a special form of mental gymnastics, in which, like all forms of gymnastics, you will achieve better results the more you practise.

Memory of Spaces

Do this little experiment.

- At night, place any object you choose on a piece of furniture or even on the floor in one of the rooms of your house.
 - Move to the opposite side of the room and switch the light off. The room must be completely dark.
 - Grope your way towards the object.
- Did you have problems finding the object?
What can you deduce from this experiment?

 You probably had no problem moving around in a familiar space without bumping into things, because the way the furniture is arranged is firmly fixed in your memory. This is another example of automatic retention - the procedural memory automatically storing information generated by the regular use of a specific place. The memorisation of familiar spaces also saves you the trouble of thinking about your movements, which then become reflex actions. Who has not felt a certain hesitation when confronted with the new layout of a room in their home or when taking a new route to work?

In a Maze...

The ability to orient yourself by visualising landmarks in space is one of the aptitudes required for playing these three games. Here, hikers who are used to reading maps will be at an advantage - their ability to orient themselves in space has already been trained. So this type of game is a good way to develop a sense of orientation and mastery of space. The more rapidly you can take your bearings, the more these skills are consolidated as efficiently functioning automatic actions.

3. The Maze

Find the only way to link the arrow on top to the arrow below.

1. The Medal

Find the only yellow path linking the arrow in the outer circle with the one in the centre.

2. The Ladybird

Find the only black path linking the two black spots on the ladybird's back.

With the exception of puzzle, the rules for all these weights and scales problems are identical. The object is to make each set of scales balance by placing all the supplied weights in the pans - one weight per pan. The weight of the rods and pans can be ignored, and the stripes on each rod are of exactly the same length. The last puzzle is more complex, so we have helped you along by placing the first weight correctly. Allow yourself 40 minutes to complete this weighty collection of problems.

Computer Bug

A nasty virus has entered your computer network. To exterminate it, you must track the highest-scoring route and the lowest-scoring route from start to finish, using the acetate sheet to track your journey. Each monitor has a numerical value, which you can identify by checking the colour-coded number bar at the top (the start and finish boxes have no values). Start by choosing

which direction to take. Carefully decode the relevant monitor and write down the number. Move to the next monitor. Having decoded the new monitor, apply the relevant mathematical operation (+, -, ÷ or x) between the two monitors to get an accumulated score, keeping a record of your score as you progress. You may enter each monitor only once.

Number Maze

Enter the maze at the top and visit all the blue numbers from 1-6 in order. On reaching each blue number the sum of the numbers you have passed must be exactly ten. Make exactly ten again to leave the maze after blue number 6.

మనది పరిచయం కాదు... స్నేహ పరిమళం. గతం కాదు... 44 వసంతాల మధుర జ్ఞాపకం.

శ్రీ..... గారికి

స్నేహం మునిపిడి వరం. అంతరంగంలో జ్వలించే భాస్వరం. మానవాళి సృజించే ఉదాత్త స్వరం. మధురమైన స్నేహితుడు మనముందు కదలాడుతుంటే మదికెంతో గర్వం. అది ప్రశాంతినొసగే పున్నమ సాగరతీరం.

శిలను చెక్కితే శిల్పం. రాయి చెక్కితే రతనం. కలను మలిచితే కావ్యం. ఈ స్నేహవేదికను కూర్చిన మిత్రులకు ప్రేమాభివందనం.

శూన్యంలోని నిశ్శబ్దంలా.....
నివురులోని నిప్పులా.....
నట్టింటనున్న నిలుపుటద్దంలా.....
మూలన పడివున్న మృదంగంలా.....

ఉన్న నాకు, మిత్రుల నుంచి కబురు. గాలి కబురుకు మనసు ఆకులు గలగలమన్నాయి. ఆనందాశ్రువులు జలజలమంటూ రాలిపడ్డాయి. కనులముందు నలభై నాలుగేండ్ల గతం కదలాడింది. మౌనంగానున్న తోటలోకి మధుమాసపు పాటలా...

గతం ఎవరికైనా జ్ఞాపకమై మిగులుతుంది. అయితే... కొందరికది మానని గాయం. మరికొందరికి గొంతెత్తి పాడుకునే మధురాతి మధురమైన గేయం. ఓ లక్ష్మంలోని జీవితం హేయం. కష్టమైనా, సుఖమైనా, ఆనందమైనా, విషాదమైనా జీవితాన్ని అనుభవించడం, కలవరించడం ధ్యేయం. ఏదీ సాధించకుంటే జీవితం బుద్బుదం. అనుకున్నది సాధిస్తే జీవితం అద్భుతం.

మనమెక్కిన రైలు ముందుకు పోతూఉంటే కొండలూ, కోనలూ, నదీనదాలూ, అడవులూ, చెట్లూ, పల్లెలూ వెనుకకు నెట్టబడుతు ఉంటాయి. జీవితం రైలుబండి ముందుకు, మున్ముందుకు పోతూఉంటే బాల్కనం, కొమారం, యౌవనం, వృద్ధాప్యం వెనుకకు నెట్టబడుతూ ఉంటాయి. అయితే అవి జ్ఞాపకాలై మనసుపై చెరగు ముద్రలై, జీవితపు రహదారిలో మజిలీలై, మైలురాళ్ళై తారసపడుతూ ఉంటాయి. ఏదిఏమైనా ప్రతి ఒకరికీ బాల్కనం నెమలి పింఛం.. యౌవనం పూలకంచం.. వంచిన మధుకలశం వృద్ధాప్యం.. ప్రశాంతంగా పడుకోసేయని కుక్కిమంచం. మరణంతో సర్వ ప్రపంచం శూన్యం.

కాలం కనులముందు కదలాడే ఇంద్రజాలం. అది ఒక మహేంద్రజాలం. కాలం గాలమై ఎవడిని బలిపీఠం ఎక్కిస్తుందో, బలిచేస్తుందో, వెన్నెలరే హాయిని గూర్చి ఆనందాన్నిస్తుందో, ఎవడి అభివృద్ధికి, అభ్యుదయానికి బండరాయై అడ్డం పడుతుందో, ఎవడికి ప్రియురాలై కరచాలనం చేస్తుందో, పడని శత్రువై ఖడ్గచాలనం చేస్తుందో ఎవరికెరుక !

అది 1979 మార్చి. విద్యార్థినీ, విద్యార్థుల జీవితాలను మార్చివేసే మార్చి. జీవిత ప్రస్థానంలో సాగించే లాంగ్ మార్చ్. ఏ కొమ్మకో, ఏ రెమ్మకో పూచిన పూవులం మనం ఆనాడు. పాఠశాల సరస్వతీ మందిరంలో వ్రేలాడే తోరణాలం. బ్రతుకు తెరువు కోసం అనంత దూరాలకూ... తీరాలకూ... పయనమైనవాళ్ళం.

లక్ష్మం కోసం సరైన ఆహారం లేక ఎన్నో దినాలు కంటికి కుసుకులేక ఎన్నో యుగాలు అందీఅందని లోకాలోకాలు. ఆ ప్రయాణంలో వాడిపోయినవి ఎన్నో వసంతాలు. తెగిపడ్డవి ఎన్నో శిశిరాలు. రాలిపోయినవిఎన్నో రాగమాలికలు.

అందీఅందని ఉన్నత శిఖరాలు, అదుగు తడబడితే అధః పతనాలు. చేజారినవి ఎన్నో సుందరస్వప్నాలు. అయినా భగవానుడిచ్చిన శరీరంతో, శక్తితో, మనసుతో, జ్ఞానంతో, సర్వేంద్రియాలతో, అహరహం కృషిచేసి తపస్సుతో మన ఉపస్సును పండించుకున్నాం.

జీవితం 360° భూగోళం. సమర్థులకు, ప్రతిభావంతులకు, అనంత అవకాశమున్న భూగోళం. అసమర్థులకు అధునిక యుగం గందరగోళం. ప్రపంచం నేడు కుగ్రామం. బ్రతుకుతెరువుకు అనునిత్యం సంగ్రామం. నేడు ప్రతి గృహం ప్రవహించే ధనం. మానవత్వమొకటే అంతర్ధానం. 'మనీ'కళ్ళతో చూస్తే మనిషీ కనబడదు, స్నేహితుడూ కనబడదు.

మనది కేవలం పరిచయం కాదు. స్నేహ పరిమళం. గతం కాదు నలభై నాలుగు వసంతాల మధుర జ్ఞాపకం. నిజమైన స్నేహితుడు గాలిలా వ్యాపిస్తాడు. నీరై ప్రవహిస్తాడు. పూవై పల్లవిస్తాడు. పదిమంది స్నేహితులతో నవ్వుకుంటే హ్యాపీ. నవ్వుకపోతే బి.పి. పూలు దాచుకున్న మధువును, స్నేహితులు దాచుకున్న నగవును అనందంగా అనుభవిద్దాం. జీవితం సగంచెక్కిన శిల్పమైనా పరిపూర్ణ శిల్పమైనా మలిసంద్యలో మనం చేసిందేమీ లేదు. మరోక్షణంలో విడిపోతున్నాం మనం, ఆనందంలాంటి విచారం మనకిప్పుడు కలుగకమానదు. మళ్ళీ ఎప్పుడో... ఎక్కడో... ఏ జన్మలో... స్నేహితులమై భుజం, భుజం కలుపుకుంటూ... గజం గజం నడుస్తామో... గలగల నవ్వుకుంటూ ప్రవహిస్తామో... ఏమో!

మరచిపోకు నేస్తమా... నా సమస్తమా... అభయహస్తమా...

పంచదారలకన్నా, పనసతొనలకన్నా, జుంటెనేనియకన్నా, జున్ను కన్నా, చెరకు తీపికన్నా,

చెలి మాటకన్నా స్నేహం మిన్న... మరచిపోకు నేస్తమా...

ముషికి శరీరం ఉంది... ఆరోగ్యం సౌందర్యం, సౌఖ్యం కావాలి.

అతనికి మనసు ఉంది... శాంతి, కాంతి కావాలి.

అతనికి ఆత్మ ఉంది... అమృత మాధుర్యం అందియ్యాలి.

ఆ భగవానుడు మా స్నేహితులకు పై భాగ్యాలను అందియ్యాలని మనఃపూర్వకంగా ఆకాంక్షిస్తున్నాను. మౌనమూ, మాటా రెండూ గొప్ప కళాఖండాలే. నేను మాటనైనాను మీరు మౌనమయ్యారు అంతే తేడా...

MISSING SHAPES

Look carefully at this series of images for a few minutes and then cover it.

Draw all the missing figures from memory, so that the line of images below is identical to the original.

CONCENTRATION

MATCHES

LOGIC

Here is a dustpan made out of matches, which contains dust. How can you get the dust out of the pan by moving only two matches while ensuring that the shape of the dustpan is retained?
