

Best Practice - 1

1. Title of the Practice: Digital Literacy

2. Objectives of the Practice

- To provide basic knowledge in computers.
- Able to know parts of computers
- Able to access computers
- To understand computer terminology
- Benefits of Computer Education

3. Learning Outcomes

- Basic knowledge of computers
- Types of computers
- MS Office
- E-Mail
- Internet browsing

4. The context:

Computer education is all about extending to its various branches of study in different fields & sectors.

Computer, along with internet facility is the most powerful device that children can use to learn new skills & abilities in education.

Computer plays a significant role in each and every field of life. They find applications in medicine, industrial process, aviation industry, making bills in various big shopping malls.

5. The Practice:

Department of Computer Science, GDC Tekkali is practising an innovative programme entitled 'Digital Literacy' under the guidance of Dr. A. SivaPrasad In-charge of Computer Science Department. The students of Degree 2nd and 3rd Year MPCs engage classes in a nearby High School 'Mahatma Jyothibha Phule A.P Backward Classes Welfare Residential School (Girls), Tekkali'. Our students take classes on every Wednesday for 7th to 9th class students during the Study Hours time from 3.30 PM to 4.30 PM.

6. Evidence of Success:

- By attending Digital Literacy class, students are able to access Computers, Tablets, Smart Phones, Printers and other devices.
- Students are able to use technology safely.
- Able to search and download important information.
- Able to share knowledge, content and resources.
- Able to engage online learning effectively.
- Gives instant information on any topic in just a single click, & many more.
- Digitally literate learners become independent, confident and discerning users of technology.

7. Problems Encountered and Resources Required

- Lack of prior knowledge in computers.
- Poor Computer facilities in school to get hands on practice
- Unable to understand and remember the computer terminology as it is a new subject to them.
- Insufficient Computers in school.
